American **HOLLY**

I have thousands of hardy nursery-grown American Hollies. All sizes and types. Some are listed on opposite page.

Let me make it plain, however, that height often gives little idea of real value. I have Hollies five feet high priced at \$5.00, while other dense, bushy specimens of the same height sell for more than \$50.00 each.

Hollies when dug vary greatly in weight, too. Printed opposite are about the average weights.

The best way to buy Hollies is to select them personally. Visitors to my Holly Farm are always welcome. I never urge sales and like to have interested people call and talk over Holly, even if they do not intend to buy.
